

## Twin Disc to Attend 50th Offshore Technology Conference

April 24, 2018

**Global leader in power transmission technology to have booth display of latest products at largest international offshore tech conference**

RACINE, Wis., April 24, 2018 /PRNewswire/ -- [Twin Disc](#), Inc. (NASDAQ: TWIN), a global leader in power transmission technology for marine and land-based applications, will be attending the 50<sup>th</sup> annual [Offshore Technology Conference](#) (OTC) from April 30-May 3 in Houston at booth No. 5075 in the main exhibit hall.

"The Offshore Technology Conference is one of the largest gatherings of rig builders, rig users and fracking professionals in the industry," said Dean Bratel, vice president of sales & applied technology at Twin Disc. "With more than 70,000 attendees expected, this show is a great opportunity to showcase Twin Disc products and solutions to businesses with which we can form mutually beneficial partnerships."

Those who stop by Twin Disc's booth will be able to see five Twin Disc products up close—two transmissions, two clutches and a pump drive:

- TA90-8501 transmission – a 3,000-horse-power transmission for oil field fracking rigs
- TA90-7601 transmission – an updated version of the 7501 model that has a new output planetary arrangement, offering deeper gear ratios in all ranges
- RC314 dry clutch – one of Twin Disc's newest products, it is remote controlled, allowing users to operate it with a simple push of a button.
- HP 1200 wet clutch – a full hydraulic wet clutch with a pump tower
- AM 345 pump drive – a three pad pump that is applicable for blenders

"We're going to have some of our latest products on display, with the 7601 transmission and RC314 clutch being relatively new to the marketplace," Bratel said. "We encourage those who both build and use rigs, particularly in the fracking industry, to come down and see how we can help them increase their equipment's performance. We offer support throughout our products' entire lifecycle, and can even collaborate to offer engineered solutions to meet the specific needs and unique challenges that our partners are facing in the industry."
